Withholding Formula ▶(Effective Pay Period 20, 2007)◀

1. Subtract the nontaxable biweekly non-Federal 401(k) contribution from the gross biweekly wages to obtain the adjusted gross biweekly wages. **Note:** Do not subtract the biweekly Federal Thrift Savings Plan contribution.

2. Multiply the adjusted gross biweekly wages computed in step 1 by 27 to obtain the annual wages.
3. Determine the exemption allowance by applying the following guideline and subtract this amount from the annual wages to compute the taxable income.

Exemption Allowance = \$1,000 x Number of Exemptions

4. Apply the taxable income computed in step 3 to the following table to determine the annual New Jersey tax withholding.
